

1

The Neptunus rain gutter tensioning system ensures that the roof canopy stays taut

2

The Neptunus raised cassette floor ensures a stable and robust base

3

Unique design creates a visually appealing pagoda

The Product

The Mercury is a high-quality, square pavilion with a clear span aluminium framework and peaked roof. This structure can be linked to other Neptunus structure designs.

Design

The Mercury membrane roof creates a stylish and modern look which comes as standard in white opaque PVC (non-permeable to light) 80%. Complimented with rigid PVC sidewall panels or glass panels; there is also the option of sliding fabric curtain walls. Finished with the Neptunus rain gutter tensioning system to ensure the roof canopy stays taut at all times and the raised Neptunus cassette floor system.

Features

The Mercury is available in six sizes:

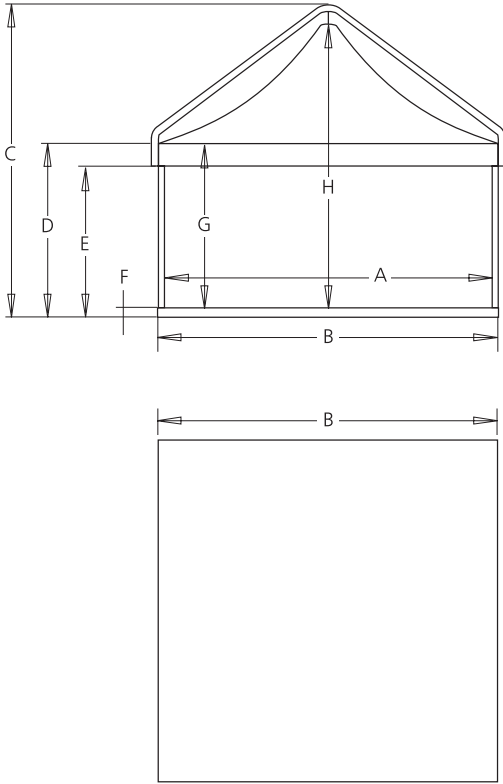

- 4 x 4 metres (16 m²)
- 5 x 5 metres (25 m²)
- 6 x 6 metres (36 m²)
- 8 x 8 metres (64 m²)
- 10 x 10 metres (100 m²)
- 12 x 12 metres (144 m²)

The sidewall height remains the same for all dimensions at 2.5 metres.

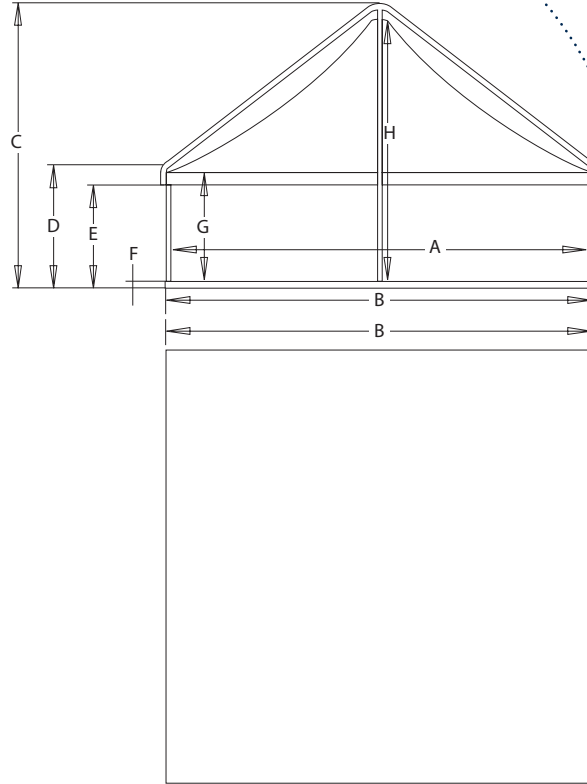

Applications

The versatile Mercury structures are often seen at country fairs and shows, culinary events, exhibitions and sporting events. However the design quality also lends itself to creating the right atmosphere for private and corporate parties.
